

Snitch's 179-Day Dynamic Ad Scaling *PLAYBOOK.*

STRATEGY
Teardown

How a D2C fashion brand kept a single Meta ad profitable for 179+ continuous days.

SWIPE →

THE APPAREL PROBLEM

Apparel ads die in 14 days on scale *FATIGUE*.

Most brands exhaust static single-image creatives within 2 weeks as CPMs spike.

**When scaling ad spend, single-angle ads hit frequency saturation.
Modular catalog ads survive.**

SWIPE →

179 DAYS

MODULAR
FEED

**Dynamic catalog feed
with real-time copy *CATALOG.***

Snitch uses modular opening hooks paired with live inventory feeds to prevent audience creative fatigue.

SWIPE →

NICHE EXPANSION

Snitch Plus category for untapped demand *PLUS-SIZE.*

Expanding into plus-size fashion created a dedicated high-converting segment.

Positioning tailored sizing with trend-first designs lifted conversion rate by 34% over generic collections.

SWIPE →

4.2X ROAS

SCALE
STABILITY

**Advantage+ delivery
stabilization at scale** *STABILITY.*

Meta's auction algorithm matches individual product cards to user browsing habits in real time.

SWIPE →

+54% AOV

Product relevance beats deep discounts *MARGINS.*

High product-market fit protects unit margins without needing 50% discount codes.

Dynamic creative personalization drives larger cart sizes with zero margin erosion.

SWIPE →

Scale creatives with modular catalog feeds *SYSTEM.*

Build modular hook variations and dynamic product catalog ads to scale sustainably.
