

Sync Offline Revenue to Meta via n8n *PIPELINE*.

STRATEGY
Teardown

How to feed closed-won sales back to Meta
Ads to optimize for high-ticket buyers.

SWIPE →

THE BLINDSPOT

Meta optimizes for cheap junk leads *BLINDSPOT.*

Without offline sales data, the algorithm chases low-intent form submitters.

Feeding back actual revenue teaches Meta's auction engine who your highest-paying customers are.

SWIPE →

15 MINS

SYNC
CYCLE

Automated Google Sheet to Meta CAPI sync *WEBHOOK.*

An n8n webhook triggers whenever your sales team marks a deal as 'Closed-Won' in Sheets or CRM.

SWIPE →

DATA PRIVACY

SHA-256 hashing for Event Match Quality *ENCRYPTION*.

Hashing customer phone, email, and IP address for 9.0+ EMQ score.

Passing hashed identifiers guarantees accurate cross-device attribution while remaining privacy-compliant.

SWIPE →

+45% ROAS

PROFIT
LIFT

**Advantage+ targets
high-value prospects** *TARGETING.*

When Meta receives conversion value signals, cost per closed deal drops dramatically within 14 days.

SWIPE →

100% AUTO

Zero manual uploads and zero CSV hassle *AUTONOMOUS.*

Autonomous data loop connects sales closing to Meta bidding in real time.

Eliminating manual CSV uploads ensures your ad campaigns never
train on stale conversion data.

SWIPE →

Feed revenue back to your ad account *GROWTH.*

Connect your CRM or Google Sheets to Meta Conversions API using automated n8n workflows.

Follow Harsh Chouksey for daily *frameworks.*
